Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Objections

1. Claims 2 and 3 are objected to because they have no period at the end of each claim.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1 and 4-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Kanagasabapathy et al. (US 2004/0161698).

The reference discloses positive and negative photoresists and methods of making a patterned material layer on a substrate (paragraphs 0001-0031), with description of the fluorosulfonamide monomer unit required in the instant claims found in paragraph 0020, 0036, 0116 and 0132. Paragraph 0132 shows the resultant polymer structure. Such polymers are described for use in resist compositions further comprising at least an acid generator (paragraph 0068) and crosslinker (paragraph 0077 and 0086) dispersed in a solvent (paragraphs 0088-0089). The composition is

then used for forming an image by deposition on a substrate, radiation exposure, development and etching (paragraphs 0093-0096). Therefore, the reference discloses all claimed limitations.

Allowable Subject Matter

4. Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable (pending correction of the minor formal matter set forth above) if rewritten in independent form including all of the limitations of the base claim and any intervening claims. While the prior art has disclosed polymers within the scope of claim 2 (see examples 11, 13 and 20 of Jayaraman et al. US 6,420,503), no clear recommendation is made to use the such polymers in a negative resist composition.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roberto Rábago whose telephone number is (571) 272-1109. The examiner can normally be reached on Monday - Friday from 8:30 am - 4:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wu can be reached on (571) 272-1114. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
